

Risk Control Services

Controlling and Minimizing Prospective Losses

Our Risk Control Team works closely with you to identify potential risks and to mitigate prospective losses. Through our administrator, Clear Risk Solutions, our risk control services are performed by a team of professionals comprised of certified risk managers who utilize the latest techniques and procedures to provide you with a personalized risk control product tailored to meet your needs. Our experience has shown that a sound approach to risk control procedures will help alleviate the impact potential losses may have on a school district.

Our process consists of identifying, analyzing and evaluating potential exposures. In addition, we provide recommendation and control measures that will reduce the frequency, severity, and effect of losses for a district and its staff. The following is a list of the types of risk control services we provide to USIP members. For a complete description of each service visit www.usipwa.us or call us direct for more details at 800.407.2027.
